

Tic Tac Toe Tests

1. Test to determine if the correct player wins

- Steps:
 - Go to site
 - Play a game until one player wins
 - Find which player is displayed as the winner
- Postconditions:
 - The player that wins the game is displayed correctly
- Results:
 - Failed Aug 27
 - Chrome v.92
 - OS: Windows 10
 - X won the game, but the site displayed "x lost"

2. Test to determine if the game ends correctly

- Steps:
 - Go to site
 - Play a game to completion for X winning and O winning
 - See if the game ends for when each player wins
- Postconditions:
 - The game ends when X wins
 - The game ends when O wins
- Results:
 - Failed Aug 27
 - Chrome v.92
 - OS: Windows 10
 - After O wins a game, the game continues

3. Test to determine if the turns are in the correct order

- Steps:
 - Go to site
 - Play a game to completion
 - Look at each space played to determine who moved
- Postconditions:
 - Each player takes turns placing their token, one after another
- Results:
 - Failed Aug 27
 - Chrome v.92
 - OS: Windows 10
 - When O should win, they instead don't place a token and it becomes X's turn
